

SAFE® Complete Care Competence Review 2022

NEWSLETTER
January 2023

Page 1/2

We leave the business year 2022 happily behind us and are looking forward to a fresh and new start into 2023! We thank you for the pleasant cooperation and wish you a healthy and Happy New Year!

We hope you could enjoy a few quiet and contemplative days, without the busyness of everyday life. Let's take the opportunity to review the year once again and look into the near future together:

Strong Brands Hand in Hand

We look back at an eventful year: At FELASA 2022 (Marseille) - JRS welcomes SDS Diets as a new member of the JRS Competence Center for Laboratory Animal Science. SDS Diets, former part of the family-owned UK company Dietex, is one of the largest suppliers of laboratory animal diets in Europe. Alongside SAFE® Complete Care Competence, Europe's No. 1 in feed and bedding, SDS Diets is now managed under one manufacturer's roof.

The laboratory animal science community profits from the synergetic expertise and leadership in premium laboratory animal diets!

Sustainable into the New Year!

We also enter the coming year with passion: In 2023, we will further strengthen our commitment to sustainable solutions. SAFE® is not just following a trend!

Sustainability and resource conservation are at the heart of our identity. Experience this in our production philosophy, product design and services!

Sustainability at SAFE®

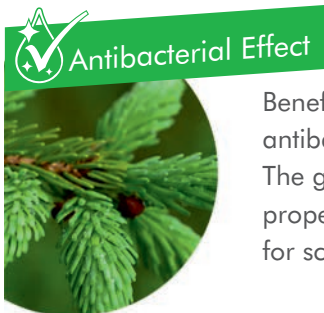

- Saving energy (ISO certified Energy Management System)
- Using energy from sustainable resources
- Raw materials from sustainable cultivation
- ZERO-Waste production policy
- Avoidance of packaging waste
- Reduction of transport effort

Sustainable without compromise! ▶
Discover SAFE® bedding and enrichment varieties, made from spruce from local and sustainable forestry.

Hygienic and Sustainable Spruce Bedding

- Softwood with antibacterial properties
- Perfect hygienic properties
- Highly dedusted
- Perfect moisture management
- Pleasant discreet smell for humans and animals
- Local sourcing cuts excessive transportation
- Guaranteed local availability
- From sustainable forestry

Antibacterial Effect

Benefit from the unique antibacterial effect of spruce! The germ- and mold-reducing properties are perfectly suited for scientific animal bedding.

From Nature to the User – The Direct Way!

For the production of SAFE® spruce bedding, only selected, untreated wood from local forestry is used. Short transport routes and PEFC-certified, responsible forestry guarantee the best possible sustainability balance for SAFE® bedding.

The company's central location in Europe ensures short distances from raw materials and to customers.

Certified Quality and Production Process

CUBIC GRANULATES

SAFE® prime S
Cubic granulates

SAFE® BK 8-15
Cubic granulates

SAFE® FS 14
Cubic granulates

The **cubic granulates** are virtually dust-free and perfectly flowable, ideally suited for automatic bedding dispensing systems.

SHAVINGS

SAFE® 3-4 S
Fibrillated fibers

SAFE® flake
