

»This is why we Call Spruce our Most Sustainable Bedding Solution!«

SAFE® Spruce Bedding is made from 100 % natural raw material. Benefit from the unique antibacterial effect of spruce - perfect for laboratory animal science!

Raw materials from sustainable cultivation

Short transport routes and PEFC certified, responsible forestry guarantee the best possible sustainable balance for SAFE® Bedding.

Central location and short transport routes

The company's central location in Europe ensures short distances to raw materials and customers.

ZERO-Waste production policy

SAFE® processes 100 % of the natural raw material. All production-related by-products are used in other industries.

more stories

The festive season is just around the corner.

With this sustainable Christmas tree we would like to thank you for your trust and loyalty.

The entire team SAFE® wishes you and your colleagues a Merry Christmas and a happy, healthy New Year!

Did you know...

...that recent research findings reveal a staggering 3.04 trillion trees worldwide, surpassing previous estimates by a large margin? However, it is also reported that more than 15 billion trees are being cut down each year, leading to a continuous decline in forests. Nevertheless, it is pleasing to see that Germany is an admirable exception to this trend.

„For us, sustainability is not just a passing trend, but an integral part of our SAFE® corporate identity. We consistently integrate sustainability into our production philosophy, product design, and services. Our premium hygiene animal bedding products are another example of how we refuse to compromise on sustainability. In addition to our high quality standards, we place great emphasis on environmentally friendly and advanced production processes that minimize energy consumption. The raw material for our animal bedding products comes from local forests that are sustainably managed and PEFC certified. This not only supports the local economy but also ensures shorter transportation distances and thus reduces environmental impact.

By the way, did you know that your traditional Christmas tree is often a spruce? We believe that this is also the ideal raw material for animal dreams, not just during the Christmas season!

Just turn the page and discover why."

With warm regards
